DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1, first diamond containing layer configuration chosen from figure 3, claims 1-16,17, and 22 generic as to this issue.

Species 2, second diamond containing layer configuration chosen from figure 4, claims 1-16 and 18-22 generic as to this issue.

Species 3, third diamond containing layer configuration chosen from figure 5, claims 1-17, 19, 21, and 22 generic as to this issue.

Species 4, a fourth diamond containing layer configuration chosen from figure 6, claims 1-16, 18, and 22 generic as to this issue.

Species 5, a fifth diamond containing layer configuration chosen from figure 7, claims 1-17 and 22 generic as to this issue.

Species 6, a sixth diamond containing layer configuration chosen from figures 8 and 9, claims 1-16, 22, and 23 generic as to this issue.

Art Unit: 2879

Species 7, a seventh diamond containing layer configuration including a projecting rib chosen from figures 10 and 11, claims 1-16 and 22-24 generic as to this issue.

Species 8, an eight diamond containing layer configuration including a ferroelectric layer chosen from figures 12 and 25, claims 1-16, 22, 23, and 25 generic as to this issue.

Species 9, a ninth diamond containing layer configuration including separating the paired display electrodes, chosen from figure 14, claims 1-15, 26, and 27 generic as to this issue.

Species 10, a tenth diamond containing layer configuration including separating the paired display electrodes, chosen from figures 15, claims 1-15 and 26-28 generic as to this issue.

Species 11, an eleventh diamond containing layer configuration including both the paired display electrodes and addressing electrodes located on the same back substrate, chosen from figure 16, claims 1-15 and 29 generic as to this issue.

Species 12, a twelfth diamond containing layer configuration including both the paired display electrodes and addressing electrodes located on the same display substrate, chosen from figure 18, claims 1-15 and 30 generic as to this issue.

Species 13, a thirteenth diamond containing layer configuration, chosen from figure 19, claims 1-16 and 22 generic as to this issue.

Art Unit: 2879

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2879

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
